1. K3|pebblestone Items

1.1 Sizes and Colours in Matrix

Products within fashion can have many different colours and sizes. To manage all these different product options in an efficient way, K3|pebblestone created the matrix throughout the whole system.

Products can also have 2 different size options and a colour option, for this K3|pebblestone has added an extra size option to the matrix, so it is possible to handle 3 dimensions in the matrix.

Take the jeans as an example, the waist and inseam are the size options and on top of that you have the colour of the jeans.

Size ranges can differ per region/country and that's why it is possible in K3|pebblestone to setup a mapping for country specific size ranges. For example, in Europe you have 36, 38, 40 etc. and in Great Britain this is 10, 12, 14 etc. Customers can order in their region/country specific size ranges.

For every colour a base colour can be assigned. It is also possible to work with uniform colour specifications like RGB and Hedex codes.

Automatically create barcode numbers in several supported formats (EAN13/EAN8/GS1 (EAN14) and assign them to items and item variants.

1.2 Item pictures

Pictures within K3|pebblestone can be setup on item level and could differ per colour level.

1.3 Seasons and Delivery Drops

Products within fashion are part of a season which can be broken down into Delivery Drops, for example Spring/Summer 1 or Spring/Summer 2. If a product is not part of a season then it is a NOOS product. The season and Delivery Drops within K3|pebblestone supports the specific way of working within fashion. These are more than just a field on the item card, these are also used when creating a sales order, purchase order and deliveries to customers.

When an item is successful it could become a Carry-over item, this means that the item is part of more than one season. You can attach different seasons on item and colour level and K3|pebblestone supports this and makes sure that the different seasons are linked to the item and colour.

1.4 Composition

On product level it is possible to setup a composition. The composition is created by choosing the raw materials and the corresponding percentages. The sum of the raw materials needs to be 100%, K3|pebblestone is checking this.

Manage  Open in Excel

1.5 Style and Fashion specific fields

A style is a higher level above the products which can group products together. When creating a Sales Order, the style can be used during order entry and you can choose products which belong to the style.

Other fashion specific fields which has been added to K3|pebblestone are Brand, Collection, Theme, Gender and Fit.

Are you interesting how this looks in K3|pebblestone [click here](#) and watch the demo video 'K3|pebblestone Items'. In just over 6 minutes we show how the Fashion specific Items are managed within K3|pebblestone.

2. Item phases within K3|pebblestone

When creating a collection, the items are going through different phases. The item phases within K3|pebblestone makes it possible to follow the lifecycle of the item, from Design to Closing Sales.

CODE	DESCRIPTION	TOTAL	PRODUCT DEVELOPMENT	PRESALES	BUYING	DELIVERY	DIRECT SALES	CLOSING SALES	BLOCKED
NOOS	Never Out of Stock	-	-	-	-	-	-	-	-
2018SS	Spring/Summer 2018	-	-	-	-	-	-	-	-
2018FW	Fall/Winter 2018	16	-	-	-	-	-	16	-
2019SS	Spring/Summer 2019	27	-	-	-	-	27	-	-
2019FW	Fall / Winter 2019	37	-	-	-	37	-	-	-
2020SS	Spring/Summer 2020	22	4	18	-	-	-	-	-
2020FW	Fall / Winter 2020	-	-	-	-	-	-	-	-

Sometimes items will not make it through the final phase, for example during the Presales an item hasn't been sold enough and minimum buying quantities aren't met. The items will not be produced and need to be cancelled on the Sales orders.

Within the different item phases some processes are available and other aren't.

The items phases are linked to the item status, down below you see an overview of the various item phases and the processes which are available per Item Phases:

CODE	DESCRIPTION	SORTING	SAMPLES OPEN	SALES OPEN	PURCHASE OPEN	RECEIVING OPEN	DELIVERY OPEN	RETURNS OPEN	NO. OF ITEMS

The total number of items in a specific Item Phase is displayed and an easy lookup navigates to the items attached.

Are you interesting how this looks in K3|pebblestone [click here](#) and watch the demo video 'Item phases within K3|pebblestone'. In just under 3 minutes we show how the Item phases and Item status work together to manage the lifecycle of items within K3|pebblestone.

3. Sales ordering within K3|pebblestone

3.1 Presales

In the fashion industry, a substantial part of sales is achieved through Presales. Using samples, the representatives are selling collections, that will be delivered months later.

When creating a sales order, the attached Order Type Presales will determine the behaviour during ordering. For presales items no stock and credit limited warnings will appear. The items are not in stock and the delivery of the items will be done months later. When the items are delivered, months later, the credit limited of the customers can be checked.

The season can be attached to the Order Type and this makes it possible that during Sales order creation it is only possible to choose items of the attached season. If NOOS items are part of the Presales they can also be made available on the Presales order.

3.2 NOOS

Beside the Presales collection you have also the in-season and NOOS collections. These items are in stock and will be delivered right away.

NOOS can also be setup in the order header and you can choose the items from the NOOS season. When a NOOS-order has been placed you send this directly to the warehouse so it can be picked, if stock is available. During ordering the stock information is available.

3.3 Ordering for distributors

Distributors are responsible for different Brands and during Sales order creation it is important to take the Brand as a starting point.

Within K3|pebblestone it is possible to choose the Brand on the Sales order and this will filter the items for the attached Brand.

The payment conditions per Brand could differ based on the customer, customer price group or country. K3|pebblestone makes it possible to set this up so during Sales order creation the correct payment conditions is attached automatically on the Sales order.

3.4 Sales Pricing

Customer specific pricing, discounts and currencies can be setup. Also, special pricing on Order Type is one of the possibilities. Items ordered during the Presales could have a lower price than when ordered during the In-season period.

Are you interesting how this looks in K3|pebblestone [click here](#) and watch the demo video 'Sales ordering within K3|pebblestone'. Within 5 minutes we show all the options of Sales order creation within K3|pebblestone.

4. K3|pebblestone Presales Plan

This is the way a Presales Process for the Spring/Summer 2020 collection could look, starting Presales of the collection in June, and closing the season with the Closing Sales in March the next year.

The green marked activities are specific for Fashion Wholesalers and during these activities it is crucial to have insight in the Product development, Sales and Purchase of the collection. This is the reason why K3|pebblestone created a dashboard around this whole process. This is not a BI dashboard where you can only look at the information, but a dashboard from where decisions can be made, and process can start.

From gathering the Presales Sales orders, making replacement and cancellation decisions up to the creation of the Purchase orders and closing the season. All managed from one dashboard which shows updated information and allows the wholesaler to make the accurate decisions.

Are you interesting how this looks in K3|pebblestone [click here](#) and watch the demo video 'K3|pebblestone Presales Plan'. Within 3,5 minutes we show what kind of information is available within the K3|pebblestone Presales Plan.

5. Cancellations and Replacements within K3|pebblestone

In the fashion industry, a substantial part of sales is achieved through Presales. Using samples, the representatives sell collections that will be delivered months later.

During the Presales period certain items prove to sell better than others. Some items may sell so poorly that the decision is made not to purchase or produce them. At that moment, the samples of the items concerned are taken out of the Salesmen Sample collection and in the remaining part of the Presales period they focus on the items that do sell well. In that case, the company must decide what to do with the Sales Orders already created for the now cancelled items – these need to be adjusted.

Within K3|pebblestone we have advanced functionality to manage the replacements and cancellations in an efficient way. K3|pebblestone searches for all the Sales orders that contain the relevant replacement or cancelled items. Actions can be set up to adjust the Sales orders, by cancelling the items or replacing the items with similar items, in an automated way.

K3|pebblestone keeps track of these adjustments so you can report on them later. Gain and loss amount can be automatically registered.

Are you interesting how this looks in K3|pebblestone [click here](#) and watch the demo video 'Cancellations and Replacements within K3|pebblestone'. In around 4 minutes we show how Cancellations and Replacements are managed within K3|pebblestone.

6. Purchase Order creation within K3|pebblestone

When all the Presales orders are placed and the Cancellations and Replacements are done, the Purchase Orders can be created within the Presales Plan. Within the Presales Plan it is possible to add additional quantity to the Purchase Order.

Page

Quantity on Presales orders and the Order Threshold is available as a statistic value. In the above example the total amount on the Purchase Order will be 220 pieces. 186 pieces are needed to delivery the items ordered on Presales Orders and the 44 pieces is extra stock available for reorders.

NOOS items can be part of the Presales buying process and delivered together with the Season products, if NOOS is part of the setup of the Season.

Are you interesting how this looks in K3|pebblestone [click here](#) and watch the demo video 'Purchase Order creation within K3|pebblestone'. In around 1,5 minutes we show how the Purchase orders are created including additional stock, if needed.

7. End of Season cancellations within K3|pebblestone

Just before the Closing Sales start, all the outstanding quantities need to be cancelled, so there is a clear view of the available items for the Closing Sales. At this moment, no customer will accept a delivery at full price. This is the moment when a stock list is created and sent to customers, so they know what they can reorder, with discount.

The delivery plan shows the summary of the outstanding items and the items which can be delivered. When happy with the results you push the button and all the Inventory Picks or Sales Shipments are printed.

Are you interesting how this looks in K3|pebblestone [click here](#) and watch the demo video 'K3|pebblestone Delivery Plan'. Within 3 minutes we show how all Sales Orders are placed in the K3|pebblestone Delivery Plan and how delivery disicions can be made.
