K3|pebblestone

7699 Matrix line is not updated when deleting a subline

When you delete a subline the matrix line in the SO and PO (check the others) is not updated and shows incorrect quantity.

7693 Matrix issue in presales plan for opening matrix on item level

Error when opening matrix on bold item line. When opening matrix when you are on a colour line you do not see the quantities until you click on the location.

7652 Document reports show incorrect addresses and document info

If you select multiple documents to print the first document shows the address and info from the last document, the second document shows the address and info from the first document, etc.

7653 Requisition worksheet is showing strange behaviour in de test environment

When carry out action message and decided to cancel the carry out the Matrix line disappears and only sublines without quantities are there. You need to go out of the worksheet and go back into the matrix line again.

7627 Price in a sales lines is not shown directly

When a user creates a sales line for an item without variants the price is not shown until you move away from the line and back again.

7718 Sales return order matrix is not bold

In the Sales return order line when in the matrix quantities has been filled the field quantity had no bold quantity to show.

7668 dropshipment issues in requisition worksheet

Placing an order on purchasing code Drop. It is possible to get dales order into Req worksheet.

But when carry out plan there is an error message “ you cannot change variant code”

7652 Document reports show incorrect addresses and document info

If you select multiple documents to print the first document shows the address and info from the last document, the second document shows the address and info from the first document, etc.

7806 Samples all genders

There is no warning anymore if you have selected 1 samples size and you would change it. You can select multiple sizes as a sample.

7758 Copy document does not correctly set PF fields

Create a sales order and insert an item and a comment line. Ship and Invoice the sales order.

Create a sales return order using Copy Document. Select the invoice just created and select Recalculate Lines.

The result is a comment line without a description (K3PF Description)

7789 Auto cancel remainder is not working in OTC direct

The function of auto cancel remainder is no longer working correctly. When auto cancel remainder was checked the leftover quantities were not posted as auto cancel remainder.

7697 Item receipt lines only shows the first variant

In item receipt lines only the first variant is shown

7714 Item Reclassification Journal | Error entering quantities in matrix

Error entering quantities in matrix.

7797 Cannot delete purchase line

It was not possible to delete the purchase line.

7845 Issue with adding sizes on the item card

You can decide up front which sizes to copy to a new item but when you want to select more sizes afterwards it is not adding them.
