# Introduction

In this release we resolved several bugs which have been reported to us.

Please check these release notes for more details.

## 1. Warning

We have done breaking changes in this release. Due to stricter naming conventions in BC17 we have renamed several parameters in global procedures and event publishers.

<https://docs.microsoft.com/en-us/dynamics365/business-central/dev-itpro/developer/analyzers/codecop-aa0072-nameofvariablesmustbesuffixedwithtypeobjectname>

We are aware that we are not supposed to do this and that it might disrupt existing customization, however it was a once or never situation and therefore we decided to implement them.

For customizations on top of our apps it can occur that you might have to change something.

Please test the customization before updating the live environment.

## 2. K3|pebblestone

### *8277 Vendor Item No. cannot be set per variant in Req. Worksheet*

The Vendor Item No. can be different per variant, but in the Req. Worksheet it is not possible to edit this in the matrix.

### *8872 Filters in function FilterPriceLine should not set conditionally*

In the function FilterPriceLine the filters on PriceListLine are set only when a Sales Price record is found. This can potentially remove all price list lines. Rec should already be the record you are deleting and therefor have all the values you need to filter and using a second variable is unnecessary.

### *8907 Item list is not update after deleting season code from sales order or changing it*

Season filter of ordertype did not work correctly on the item list when changing ordertype.

### *8946 Search on pf description field does not work in a salesorder*

Search on K3PFdescription does not work correctly in a salesorder.

### *8962 Bincode on item journal is not validating correctly*

When entering the bin code it was not validating correctly to the matrix.

### *8973 Matrix statistic is not updated in transfer order matrix*

Matrix statistic is not updated in transfer order matrix.

### *8975 It is Impossible to select item code correctly if multiple items with same 'Base code' exist*

When you have 2 items with the same base code you could not select the first one when you had no brand or season filled on the sales order header.

### *8987 Prepayment invoice compressed disabled does not work correct in combination with Pebblestone*

Made changes for prepayment not compressed in combination with using a matrix and variants on salesorder.

### *9033 Changing bincode and validation on purchase and sales order does not work correctly*

Bin is added to the matrix of the purchase order, sales order, purchase return order and purchase sales order so you are able to fill the bincode per variant.

### *9039 Delivery priority code is not updated on the sales lines*

When you changed the delivery priority code it was not updated to the sales lines.

*9045 Item is copied with Assembly BOM Status Released*

When an item with an Assembly BOM is copied by Copy Item function the Assembly BOM Status on the new item is Released.

*9046 Assembly BOM: Incorrect Lookup in Color-Color Matrix*

Assembly BOM: Incorrect Lookup in Color-Color Matrix

*9053 Values not updated to sublines in Warehouse Activity Line*

Values were not updated to sublines in Warehouse Activity line.

*9055 Ordertype is not updated on the sales order line*

When you entered ordertype in the header after you entered the item and quantities it would not fill the Ordertype fields correctly in the sales order lines.

*9123 Prepayment invoice is not correct in combination with Pebblestone disabled compressed prepayment compressed enabled*

Made changes for prepayment compressed in combination with using a matrix and variants on sales order.

*9127 Quantity field should not be editable in Physical Inventory Journal*

Quantity was editable in the journal. This is not correct because it is a calculated field.

*9129 The button open the matrix for on the Physical Inventory Journal should be made invisible.*

The lines in the journal are not matrix lines so it should not be possible to open a matrix.

*9130 Indirect Cost % in Item Journal*

Added Indirect Cost % in statistic in matrix of item journal to solve inconsistency.

*9148 "Qty (calculated)" must not be editable in matrix for physical inventory*

"Qty (calculated)" was editable and we changed it.

*9165 Correct option posted sales invoice gives error message*

Correct option posted sales invoice gave error message because of matrix line.

*9179 On the Sales blanket order you cannot enter same item with same variant twice.*

Matrix and pffields are added and entering the same item with same variant twice is solved.

*9180 Extended text automation does not work correctly on sales order*

When you setup automatic extended text on the item the extended text was not added automatically when you added the item to a sales order.

*9207 Copy document in sales order with 2 lines for 1 item gives error message*

Copy document in sales order with 2 lines for 1 item gives an error message.

*9245 Item matrix second size does not show color*

Has been fixed and field is shown in item matrix. Color filtering is enabled in matrix.

*9276 K3PFplanned receipt date is not updated in purchase order line*

K3PFplanned receipt date was not updated in purchase order line.

*9299 K3PFVariant Code is not filled correctly on the posted transfer shipment and receipt*

K3PFVariant code will be filled with variants code or a \* when more than 1 variant is on the shipment.

*9149 Overflow error complementary seasons in ordertype for French localization*

Due to translations with more than 20 signs you will get the error message to overflow. Change translations of define filter in French to Autre filters.

### 3. K3|pebblestone PDM

*9028 Incorrect Caption Request Option Page BOM Requirement Sheet*

Incorrect Caption Request Option Page BOM Requirement Sheet.

*9041 BOM Requirement Sheet shows only same color in several matrix lines*

BOM Requirement Sheet shows only same colour in several matrix lines.

*9177 Removing a size on a new item gives on Measurement gives an error for another item no.*

Got an error message when removing a size on a new item.
