## 10977 Transfer lines posted for shipment not in receipt worksheet

After posting a transfer line for a shipment it is not possible to get the transfer line into the receipt worksheet. This has been corrected.

## 10978 Create a warehouse receipt for a sales return order from the receipt worksheet

It is now possible to create a warehouse receipt for a sales return order from the receipt worksheet.

## 11043 Report sales order confirmation show comment lines

The comment lines on the order confirmation report 11006150 are now shown. This has been corrected. When the order is posted the comment lines are shown on the reports posted sales invoice and posted sales shipment.

## 11095 Incorrect reservation entries are created

When a reservation is manually created for more than one size in the matrix, the same line no. is created for 2 different variants. This has been corrected and the line no. is now unique for every variant.

## 11096 Auto cancel remnants purchase order does not work

When enter a quantity to receive less then outstanding quantity and 'Auto Cancel Remnants' is set to 'Yes' then the quantity is not changed and differences are not created. This has been corrected.

## 2. K3|pebblestone manufacturing

### 10786 Wrong description and quantity in production order

When a production order is created by 'carry out action' from the planning worksheet, an incorrect description and quantity are shown in the production order (header). This has been corrected.

### 10996 Copy production order does not create the matrix lines correctly

When creating a copy of the production order the created lines are now showing the correct information. This has been corrected.
