based on Microsoft Dynamics 365 Business Central 2021 Wave 1 (v18.0)

Contents

k3 pebblestone

Introduction

In this release we resolved several bugs which have been reported to us.

Please check these release notes for more details.

1. K3|Pebblestone

9438 When transfer order is set to direct only shipment is posted from delivery worksheet

When a transfer order is set to direct transfer, only the shipment is posted from the delivery worksheet. Not the receipt of the transfer order.

9895 Assembly orders | wrong description on lines

On assembly order the wrong the item description of the first item on the assembly order line was shown. This is not correct.

9924 Error when creating new subline by matrix in Requisition and Planning Worksheet

It is not possible to create a subline by a matrix in Requisition Worksheet and Planning Worksheet. When one specifies a quantity for an empty cell in an already existing matrix, an error appears: "The record in the table Requisition Line already exists. Identification fields and values..."

9926 Receipt Worksheet - after posting, line still exist without description

After posting a partially receipt in the receipt worksheet the line will still be in the receipt worksheet but the description field is empty.

9964 Wrong item description on Quote

It showed the item description with the first variant description. Changed to item description.

9976 Error Sales Price already exists on Copy Item

Solved error message when you copy an item with sales prices enabled.

9977 Error Assembly BOM Status must be equal to 'Open' on creating new assembly BOM

When you created an item with copy item without an assembly bom the status on the item was still released. It copied the status from the default item.

9990 Bincode field does not open matrix

The K3PFBin Code field already opens the matrix. But also the standard BC field "Bin Code" was visible. We have applied the application area K3PFShowNonFashionFields to the standard field.

10050 Selecting a colour that is out of use to an item gives unclear error

When you selected a colour on an item which has status out of use on the color the message was not clear why you could not add it to the item. This message has been changed.

10154 Warehouse shipment: Shipping only first variant does not work correct

When posting a warehouse shipment for only the first variant this quantity was posted but the remaining qty of the other variants where not shown on the warehouse shipment line.

10162 Auto cancel remnants in combination with post only lines with quantities results in permission error on deleting a record in a posted table.

Permission error on deleting a record when certain module is not in the license.

10166 French translations: strange signs are shown on pages and print

Strange signs are show on pages and prints
