based on Microsoft Dynamics 365 Business Central 2021 Wave 2 (v19.0)

Contents

Introduction	2
1. K3 pebblestone.....	3

Introduction

In this release we resolved several bugs which have been reported to us.

Please check these release notes for more details.

1. K3|pebblestone

10745 Report K3|pebblestone cancellation confirmation – matrix

Report 11006156 – K3|pebblestone cancellation confirmation – matrix has been adjusted and is now also showing cancellations done directly on the sales order.

10763 Fields in the Purchase order lines aren't correctly filled

Fields in the purchase order lines are not correctly filled when the purchase order is created through presales plan. *No code has been changed but is working correctly in BC19.0.*

10809 Lines stay in receipt worksheet after posting in combination with over-receipt

When you posted a line in receipt worksheet (using more receive) the line stays there. This has been corrected. *No code has been changed but is working correctly in BC19.0.*

10818 Changing value in type field on document and journal

- Item journal
When you change the value on the entry type field of an item journal, the message is shown to suggest deleting the line and create a new one if it is intended to change the type. This way it prevents the deletion of the complete matrix line unintentional.
- Sale order
When you change the value on the entry type field on a sales order, the message is shown to suggest deleting the line and create a new one if it is intended to change the type. This way it prevents the deletion of the complete matrix line unintentional.
- Purchase order
When you change the value on the entry type field on the purchase order, the message is shown to suggest deleting the line and create a new one if it is intended to change the type. This way it prevents the deletion of the complete matrix line unintentional.

10838 Assembly order quantities not filled when quantity or variant code is specified

In an assembly order when quantity is specified on the assembly header, the fields quantity per, quantity, remaining quantity etc. on the assembly line are now correctly filled.

10842 Business Central removal of action for Item Cross References

Microsoft has removed the action for Item Cross Reference and K3|pebblestone has put this back.

10843 Incorrect translations

We corrected some incorrect Dutch translations in the Item worksheet
