# 1. K3|pebblestone

## 11162 Shipping agent not filled on warehouse shipment

When you create a warehouse shipment from the delivery worksheet the shipping agent is not filled. This is now corrected and filled with the correct value.

## 11179 Deleting a purchase order

Deleting a purchase order without a vendor assigned to it causes an error. It is now possible to delete.

*Support request 87414*

## 11184 Matrix on sales return created from posted document

When creating a sales return order from a posted document the matrix for a prepack was not presented. This has now been corrected.

## 11186 Planning worksheet – item no.

When a line is created on the planning worksheet without the No. field specified, an error is raised. This has been corrected

## 11142 April Pricing Hotfix

To quickly facilitate a matrix solution for sales prices, purchase prices and line discounts a synchronization has been create between price list line and sales prices, purchase prices and line discounts.

When enabling the new pricing feature the upgrade procedure can cause errors because of duplicate price list lines.

After enabling the new pricing feature this synchronization can cause errors because of non-existing functionality in old pricing feature.

This has been corrected.
