# 1 K3 Pebblestone

## 11081 Ratio Curve is free field and no No. serie

The option to set up a No. serie for the Ratio curve has been deleted which was causing an error message.

## 11244 Order type should not be deleted when used

When an order type is being used in a sales order, it is not possible to delete the order type.

## 11354 Description on transfer line is not validated

When a description is filled on a line with no item no. specified the description field is not validated with the K3PFDescription. This has been corrected.

*Support request 87559*

## 11355 Bin code on Physical inventory journal

The bin code has been made available on the Physical inventory journal on matrix value Physical inventory.

*Support request 87561*

## 11358 Opening matrix from quantity field causes runmodal error

When opening the matrix from the quantity field, which was causing a runmodal error on the following posted documents, have been corrected:

- Posted Inventory Pick
- Posted Inventory Put-away
- Posted Transfer Shipment
- Posted Transfer Receipt
- Posted Warehouse Shipment
- Posted Warehouse Receipt

### **11363 Incorrect reservations are created from transfer order**

For an item on which order tracking policy is set to at least tracking only, incorrect reservation entries are created with reservation status = surplus. This has been corrected

*Support request 87365/ 87546*

### **11366 Over-receipt in receipt worksheet**

The way over-receipt is working on the purchase order has been copied over to the receipt worksheet. On the receipt worksheet the rules of over-receipt are now respected.

### **11368 Some K3PF fields remain blank in subcontracting purchase order**

When a purchase order is created from the subcontracting worksheet the following fields remain blank on the sublines:

- K3PFDescription
- K3PFPlanned Receipt Date
- K3PFExpected Receipt Date

This has been corrected.

*Support request 87567*

### **11404 2nd size field is missing in receipt Line**

The 2nd size field is missing in the in K3BRReceipt Line (Suite)

### **11421 Update Italian translation**

The caption has been changed in the file K3 Pebblestone:

Table 3239302515 - Property 2879900210

Table K3PF Size Range Size - Property Caption

Changes made from "Scalarino taglie" to "Taglie scalarino taglie".

*Support request 87584*
