

# Manufacturing

K3 Pebblestone's Manufacturing features enable businesses to handle manufacturing scenarios based on Assembly or Production Bill of Materials (BOM). Brand owners handling the manufacturing process, either in whole or in part, can utilise the comprehensive material and production planning functionality to drastically improve efficiency. K3 Pebblestone offers the following for full and light manufacturing scenarios:

## Full manufacturing

### Production BOM for colours and sizes

Easily view different product colours and sizes with the production BOM matrix that displays selected values in rows and columns.

### Comprehensive material and production planning

Full Material Resource Planning (MRP) and Master Production Schedule (MPS) functionality ensures you never miss a deadline.

### A single view for orders, worksheets and journals

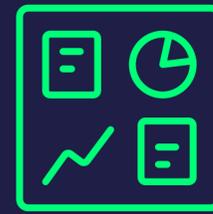

Production orders, planning worksheets, production journals and subcontracting worksheets can also be viewed in the matrix.

## Light manufacturing

### Assembly BOM requirement calculation

Effortlessly calculate the materials of ready-made items using Assembly BOM requirement worksheets based on either purchase or sales orders.

### Reports on material consumption

Seamlessly communicate with third-parties using Assembly BOM reports to show material consumption based on the colour and sizes of items.

### Purchase order creation of the materials

K3 Pebblestone allows brand owners to easily create purchase orders with the materials needed for manufacturing to save significant time.

# About K3

As a Microsoft Cloud for Retail launch partner, K3 champions but one ideal: to foster an ethical and socially responsible world driven by sustainable practices.

We have innovated retail technology for the last 30 years, but today, we simply aim to empower others to make greener choices – and that starts with our solutions.

K3 blends its own IP with third-party products to create platforms that are truly transformative and enable forward-thinking brands to unlock enduring value and trust from intelligent, agile and sustainable business practices.

With purpose and pace, K3 will permanently transform fashion, apparel and select retail markets into a model of good business, transparency and ethical sustainability.
