

# Sales Ordering

K3 Pebblestone's Sales Ordering offers multiple tools and functionality to increase efficiency and save time when creating a sales order – be that for prepack, consignment, or a different order entirely. Businesses can also utilise ratio curves to quickly complete orders in bulk and further improve efficiency.

## Pre-sales ordering

Seamlessly plan for future seasons by completing pre-sales orders and attaching a season to an order type to ensure it arrives when you need it.

## Never out-of-stock ordering

Quickly check NOOS product information and availability before ordering them directly to your warehouses ready for picking.

## Simplified ordering for distributors

Distributors can choose a brand when creating a sales order and automatically filter the products needed specifically for the attached brand.

## Ratio curves

Utilise ratio curves to quickly enter a large number of items when creating a sales order to save time and boost efficiency.

## Prepack ordering

Both the item number and prepack number are linked – meaning they'll stay together as one entity throughout the entire system.

## Consignment orders

Effortlessly create a sales order in consignment to return any unsold goods at the end of season and help maximise your margins.

# About K3

As a Microsoft Cloud for Retail launch partner, K3 champions but one ideal: to foster an ethical and socially responsible world driven by sustainable practices.

We have innovated retail technology for the last 30 years, but today, we simply aim to empower others to make greener choices – and that starts with our solutions.

K3 blends its own IP with third-party products to create platforms that are truly transformative and enable forward-thinking brands to unlock enduring value and trust from intelligent, agile and sustainable business practices.

With purpose and pace, K3 will permanently transform fashion, apparel and select retail markets into a model of good business, transparency and ethical sustainability.
