

Season Management

K3 Pebblestone's Season Management provides outlined parameters for seasonal collections to provide greater insight and heightened performance with faster decision-making to drastically streamline efficiency. It also boasts increased design creativity while decreasing costs by mitigating issues like over-development and design errors.

Pre-season planning for collections

Determine the optimal product mix to empower developers and give them control over products that have been added against planned price points.

Control availability of items & variants over different processes

Effortlessly control the availability of certain products and variants to ensure you have what's needed, when it's needed.

Never out-of-stock

Conveniently handle NOOS items and their respective details so customers know they're available at any given moment.

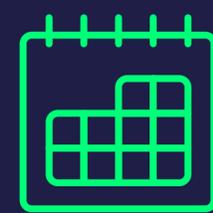

Pre-sales granular insights

Effortlessly manage the pre-sales process with granular insights and ensure you can amend or cancel orders based on previous sales data.

Manage item phases with ease

Accurately monitor item phases to ensure products are delivered or shipped to the intended destination for every season, every time.

Carry-over products into multiple seasons

Insight into product performance on a season-by-season basis ensures you can easily carry-over a successful product to a new season and keep selling it.

About K3

As a Microsoft Cloud for Retail launch partner, K3 champions but one ideal: to foster an ethical and socially responsible world driven by sustainable practices.

We have innovated retail technology for the last 30 years, but today, we simply aim to empower others to make greener choices – and that starts with our solutions.

K3 blends its own IP with third-party products to create platforms that are truly transformative and enable forward-thinking brands to unlock enduring value and trust from intelligent, agile and sustainable business practices.

With purpose and pace, K3 will permanently transform fashion, apparel and select retail markets into a model of good business, transparency and ethical sustainability.
